

OUR VALUES

At Lean Transformations Group, we help organizations build problem solving cultures, navigate growth, and transform in the ways they must if they are going to thrive.

We advise organizations on how to own lean change work from within and build powerful teams.

Oh, and we aim to stay human in the process. We look forward to meeting you.

Our intent is to help you improve your business by creating real value for your customers, your community, and all of your stakeholders.

We are in business to share knowledge about how to develop leadership for increased performance improvement, systems design, and problem solving that we've gained through hard-won experience.

We believe in workplace cultures of respect. We work with clients who recognize the extraordinary knowledge and effort that people put into their work.

We believe leadership is about knowing how to create teams of people who are meaningfully engaged in their work and take responsibility for solving problems.

We understand that in the end, performance improvement is about making more money. We think that's okay! Every business needs to be financially sustainable; it is your role to use those resources responsibly.
